Dear Customers,

Dear Customer,

Welcome to this new publication designed to showcase many of the key products associated with infection control and aerosol generating procedures in various environments within the dental practice, and how you can incorporate safer measures into your practice and day to day workflows.

At Henry Schein we take very seriously the commitment to helping healthcare professionals manage the impact of the COVID-19 outbreak. We strive to be a valuable business partner that our customers can rely on to help operate efficiently and deliver quality patient care. We are always ready to stand by you during these challenging times. We thank you for the trust you have placed in us and hope you will find the content provided within this publication useful, as you look to restart your practice.

Kindest Regards,

John Rice
Equipment Sales and Service Manager
Henry Schein Ireland

The all-in-one solution for air quality problems in a dental environment.

VK 401

The perfect air purifier and steriliser for treatment rooms. Combining pre filter, HEPA filter, activated carbon and the reactor cell of 8 super UVC lamps with 40 TiO₂ hexagon filters makes it the ultimate solution for spaces up to 60m²

Weight 12.9 kg.

Dimensions (mm) 365 H x 156 D x 581 W. 38-44dB.

Airflow 70-141CFM.

Available as a free standing and optional wall mounted unit.

VIRUSKILLER™ vs. CORONAVIRUS

Respiratory viruses are no match for our sterilisation chamber.

Our patented, core technology has been tested against Coronavirus DF2 (not against SARS-CoV2), Adenovirus, Influenza-virus and Polio-virus. The results show a **99.9999% kill rate** in a single air pass.

VIRUSKILLER™ vs. THE REST

Two key factors to consider when using technology to reduce airborne and droplet virus exposure:

Controlled airflow

Take the danger away from the breathing zone and replace it with clean air. Where possible, create a laminar airflow

Single air pass

Use technology that can give a virus kill rate. Kill rates can only be given by tests conducted on a single air exchange

Scientifically proven to

actively sterilise against coronavirus strains - Institute of Medical Sciences, School of Medicine, National Kangwon University.

VK 103

VK 103 has filters at the bottom of the unit for the recirculated air and filters at the back of the unit for outdoor air. All filtered air then goes through the reactor chamber to destroy viruses and neutralise gases. The VK103 unit can also be used to regulate positive pressure for medical and healthcare facilities. Targeting a room size of up to 100m².

The perfect air purifier and steriliser for larger open plan rooms. Combining pre filter, HEPA filter, activated carbon and the reactor cell of 8 super UVC lamps with 70 TiO₂ hexagon filters for spaces up to 100 square metres. Multiple units can be utilised for larger spaces.

Weight 38 kg.

Dimensions (mm) 1570 H x 320 D x 320 W. 40-49dB.

Airflow 200-358CFM.

Available as a free standing unit.

Hextio

Designed to neutralise dangerous airborne particles and suitable for smaller non clinical rooms, up to a maximum size of 20 square metres. It is an ideal unit for reception desks and smaller communal areas.

Weight 1.2 kg.

Dimensions (mm) 330 H x 106 D x 126 W. 40-49dB.

Airflow 12-20CFM.

Available as a free standing unit.

SURFACE DISINFECTION - STEAM

Polti Sani System Range

**POLTI SANI
SYSTEM BUSINESS**

**POLTI SANI
SYSTEM PRO**

**POLTI SANI
SYSTEM BUSINESS**

The Polti Sani-System range was developed in 2006 as a rapid physical method of disinfection, for frequent use with zero drying time. It uses a nontoxic solution that can be used in the presence of staff and patients and requires no direct contact with potentially contaminated surfaces. With a 99.99% demonstrable efficacy to kill viruses, bacteria, germs, fungi and spores. This is the ultimate solution to surface disinfection in your practice.

- Allows frequent disinfection operations during the day
- Acts on all surfaces quickly and dries in seconds
- Reduces the risk of cross infection: no contact with treated surfaces
- Can be used in the presence of people: hpmed
- Detergent is classified as non hazardous
- Uses only tap water and hpmed.
- Ideal for all surfaces

PROTECTIVE BARRIER SCREENS

SHOP SHIELDS

Help prevent the spread of viruses with protective screens

In light of the Covid-19 Coronavirus pandemic businesses across the country are taking steps to implement safety measures. Social distancing alongside the installation of physical barriers is considered to be the most effective way of protecting staff and the public from the spread of virus. Cough screens and sneeze guards by Shop Shields offer an ideal solution for receptions and waiting areas in dental surgeries. Creating a protective barrier and helping prevent the spread of viruses by blocking infectious airborne particles. ShopShield's range of Reception Desk Shields have been designed and made to meet the specific needs of dental practices and health clinics. Offering protection, whilst allowing for clear viewing and communication between staff and patients, with a small opening for transactions.

AUTOCLAVES

Melag 41B+ EVOLUTION

Quick, easy-to-use and stand-alone – now with DRYtelligence this high-performance steam steriliser brings a host of new features and benefits as well as impressive capability and drying time.

Its innovative double chamber technology allows the sterilisation and drying of unwrapped instruments in only 10 minutes; wrapped instruments in a Class-B program require no more than 20 minutes.

Both times include fractionated pre-vacuum and drying. The patented intelligent drying system DRYtelligence uses specially-developed algorithms to adapt the drying to the load in order to shorten the operating times even further and save resources.

The Vacuklav 41 B+ Evolution is fitted with a patented air-cooling system, making it into a true stand-alone steam steriliser as it requires no connections other than to the electricity supply.

Benefits:

- Sleep mode button on the front of the unit for energy saving.
- New blue colour touch screen/can revert back to full colour screen if required.
- DRYtelligence technology adapts the drying time to the load weight.
- New flip down front panel to access the water drain valves.
- Ethernet connection.
- Load volume of the Evolution is an impressive 9kg.
- Shortened drying times = savings in energy and costs.

Melag 31B+

Class B vacuum autoclave with a variety of cycles.

- Integrated clean and waste water tanks.
- Optimum usage of sterilisation chamber (up to 5 trays).
- Noise suppression feature included.
- Comes complete with Data Logger.
- Specifications:
 - Volume 18 litre
 - Chamber \varnothing 250 x 350mm
 - Power supply 230V/50Hz/2,100W
 - Weight 44kg
 - Dimensions (W)425 x (H)485 x (D)570mm

AUTOCLAVES

Melag 29VS

MELAG

Compact but powerful Class S autoclave.

- Simple and efficient pre-sterilisation vacuum pump.
- Integrated clean and waste water tanks.
- 25 mins Quick Program for unwrapped instruments.
- Comes complete with Data Logger.
- Specifications:
 - Volume 17 litres;
 - Chamber ø 250 x 350mm;
 - Power supply 230V/50Hz/2,100W;
 - Weight 45kg;
 - Dimensions (W)425 x (H)485 x (D)570mm.

Faro Nisea

FARO

Designed to simplify the operations of loading and unloading of both water and tools, in order to make the sterilisation cycle as easy as possible.

- 5" high-definition colour touch screen display.
- Designed to preserve the efficiency of the autoclave and avoid deterioration caused by limescale, the conductivity sensor checks the quality of the inlet water in order to guarantee correct operation of the machine over time.
- All cycle data and related reports are automatically saved in the internal memory and can be downloaded in digital format (PDF) via USB, Ethernet and Wi-fi (optional) or in paper format, using the dedicated external printer.
- Developed to guarantee precise and effective drying in any condition and with any type of load.
- The B-Flash cycle, flagship of FARO technology, allows to carry out class B cycles in a shorter time, preserving all the qualities of this type of cycle.
- Available in 18L and 23L capacity.

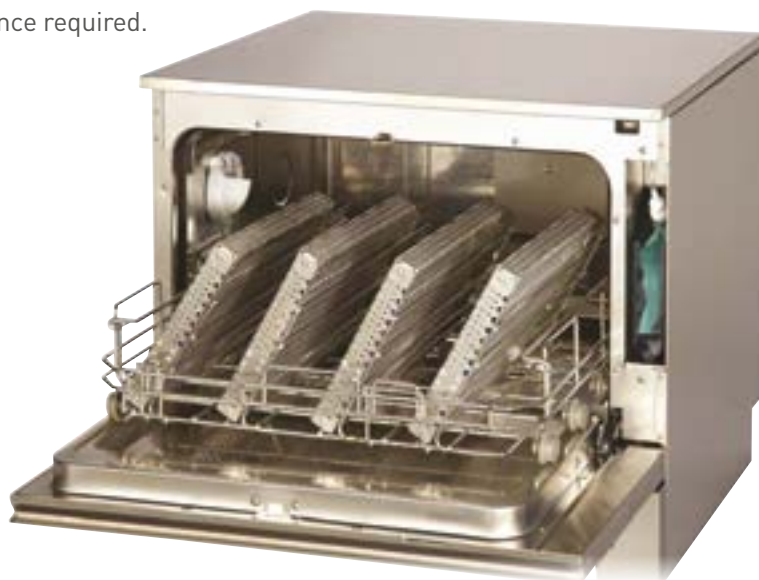

WASHER DISINFECTORS

SciCan benchtop HYDRIM C61 wd G4

SciCan

Washer disinfectant that can be used as a countertop unit or built into a steri-centre below counter.

- Processes over 120 instruments in 60 mins.
- G4 web portal includes data storage, service logs and remote access capabilities.
- Validated cycles to ensure repeatable washing performance.
- Improved service, reliability and minimal maintenance required.
- Robust stainless steel exterior.
- USB port for data storage.
- Active hot air drying.
- Specifications:
 - Dimensions, (W)598 x (H)520 x (D)526mm
 - Weight: 44kg
 - Power supply: 208-240V/60Hz

MELatherm® 10

MELAG

Compact external dimensions with features including active drying and batch documentation with CF card or network.

- HEPA air filter.
- Built-in water softener.
- 16 AMP single phase or 16 AMP 3-phase power supply.
- Integrated process agents storage and dosing unit, no need for a separate dosing cabinet.
- 5 programs.
- Fits under a standard, 600mm depth work surface.
- Specifications:
 - Dimensions (W)598 x (H)818 x (D)678mm
 - Chamber (W)465 x (H)405 x (D)448mm
 - Power supply 400V/50Hz/16 Amp/3-phase, 220V/50Hz/16 Amp/single phase

Dental Unit Waterline

Miele PG8581

The ideal washer-disinfector for dental surgeries, thanks to its safe and reproducible cleaning and disinfection of dental instruments.

- Features improved performance, capacity, and safety standards, allowing you to clean quickly and efficiently, whilst not compromising on cleaning standards.
- Variable speed heater pump.
- EcoDry patented AutoOpen function.
- Optimum cleaning performance.
- Optimum wash pressure.
- Low consumption values.
- Short batch time.
- Crevice-free wash cabinet.
- Spray arm pressure monitoring.
- Spray arm monitoring.

Miele

HANDPIECE LUBRICATION UNIT

DAC Universal Handpiece Cleaner

Perfect solution for cleaning, lubricating, disinfecting and sterilising handpieces.

- No more manual post-surgery manipulation of handpieces.
- Up to 6 handpieces can be cleaned internally and externally, lubricated and sterilised.
- Ready to use.
- HTM 01-05 compatible.
- The whole cycle takes only 18 mins from soiled to autoclaved handpiece.
- Specifications:
 - Dimensions (W)360 x (H)350-600 x (D)370mm;
 - Weight, 23kg;
 - Power supply, 90-240V/50-60Hz;
 - Water consumption, approx. 400ml per cycle.
 - Weight: 23kg

B.A. INTERNATIONAL

SEALING DEVICE

Melaseal Pro

MELAG

Validating rotary sealing device.

- Sealing of sterilised packages is more reliable because the MELAseal Pro is validated without restriction by EN ISO 11607-2.
- With each sealing procedure, the sealing temperature, the contact pressure and the throughput speed are monitored.
- The data acquired can be printed or archived electronically.
- The high throughput speed of 8 m/min ensures rapid work in the practice with continuous turnaround of sterilized items.

anthos
GLOBAL DENTAL PARTNERS

Anthos A7

Style, comfort, modern technology and peace of mind in your practice... for your patient, your team, for you. With automated sterilisation and cleaning and remote monitoring and diagnostics

Automatic Intensive Disinfection System

BIOSTER is a hygiene device that carries out intensive disinfection of dental unit waterlines enhanced with silver ions that boost the biocide action. Studies made by Anthos demonstrate this system ensures the microbiological quality of the delivered water keeping the bacteria count in the delivered water at zero. The BIOSTER process with Peroxy Ag+ has been scientifically validated as providing high level disinfection and as an effective mycobactericide, bactericide, anti Legionella bactericide, yeasticide and 99.6% sporicide.

Automatic Flushing System

A.C.V.S. Automatic system for the flushing and disinfection of the suction system for eliminating stagnant liquid from tubing after the dental unit has been idle and allows sanitisation to be performed between patients, as per CQC recommendations and HTM 01 05 guidance.

A-dec 500

Premium. Graceful. Comfort.

Redefine dentistry with an easy to clean, sleek, modern and uninhibited design.

- 511 with formed upholstery
- 541 combined delivery system and 4 position assistant's instrumentation with circular work surface
- Deluxe Plus touchpad
- 2 x 3-in-1 syringe
- Fibre optic outlets
- LED Electric micromotor
- LED Scaler
- Standard tray holder
- 576 Ceiling mounted LED operating light.

A legend, redefined - Designed to function holistically and intuitively, the new A-dec 500 quietly slips into the background, reacting to your every move, without pause. Experience the next level A-dec 500.

Optimal access - Get in close, and position everything you need within reach.

Flexible integration - What you need today, with a flexible design that lets you configure the clinical instruments you choose.

Intelligent control - Customisable and easy to navigate. Add additional instruments now or later. You're in control.

Superior care - Comfort and stability add up to a superior patient experience.

Perfect proximity - Everything you need is easy to position and comfortably within reach.

Cattani Micro Smart Cube

Cattani AC200

Cattani AC300

Cattani Micro Smart

Cattani Turbo Smart

Cattani AC400

Key to finding the right suction system

VS = vacuum-generating suction unit with integrated separation
VSA = vacuum-generating suction unit with integrated separation and amalgam separator
V = separation in treatment unit, dry airways to suction unit
VC 45 = surgical suction unit ideal for blood, dentine and bone residue

Key to the power rating

The power of the suction systems is based on a factor of 300, which represents a suction power of 300 L/min on the large suction cannula. For example, the VS 600 has the power of two operator workstations working at the same time.

OPTIMA EOS 350

B.A. International's extraoral dental suction system with medical grade filtration and ultraviolet disinfectant system efficiently purifies air in enclosed clinics. Its intelligent airflow dynamics prevent blow-up of particles from floor surfaces and exhausts away from dentist and patient.

Key Features

Ultra strong suction power

With its strong suction motor of 1.2kW and volume of suction up to 3,000 L/min, the BA OPTIMA EOS 350 effectively captures droplets and aerosols produced from dental treatments while ensuring patient comfort.

Intelligent Airflow Dynamics

The exhaust air is released from a rear-mounted air vent at the top of the system to prevent blow-up of any dust particles or contaminants from floor surfaces. The air vent located at the rear maximises comfort during treatment and circulates clean air in the room.

Medical grade filtration system

The medical grade triple layer HEPA filter traps 99.995% of particles \rightarrow $0.3\mu\text{m}$ (H1 European standard EN779-1993) with a long service life of 1 year (or 1,000 hours).

Medical grade ultraviolet disinfectant system

The double UVC lamps positioned before the HEPA filter sterilise virus and bacteria that are trapped by the filter. UV disinfection is considered safer than plasma disinfection. The lifetime of this system is expected to be \rightarrow 8,000 hours of continuous use.

Additional Benefits

- Airtight casing - prevents contaminants from escaping and reduces noise
- Lightweight design for easy moving between surgery's using ergonomically placed pull handles
- Auto HEPA filter replacement reminder
- Adjustable power levels
- Optimized height for easy handling
